EDUCATION

VELLORE INSTITUTE OF TECHNOLOGY(AMARAVATI), GUNTUR 2021 – 2025

B Tech (Bachelor of Technology) Computer Science Engineering (CSE) (8.76 CGPA)

Nxtwave Disruptive Technologies Oct 2021 - 2025

Industry Ready Certification in Full-stack Development

SKILLS

Frontend: HTML, CSS, Bootstrap, JavaScript, React.js

Backend: Node.js, Express, Spring Boot, SQLite, REST APIs, JSON, Apache Airflow

Tools & Practices: Git, Webpack, JWT Authentication, Agile Scrum, Data Structures and Algorithms, Object-Oriented Programming

EXPERIENCE

Associate software Engineer | Deltek (On-Site) October 2025 – Present

- Built and maintained enterprise integrations between Replicon and external systems using Python and REST APIs.
- Migrated legacy Workato workflows to Apache Airflow, improving pipeline execution speed by 35 percent and reliability by 40 percent.
- Designed and optimized Airflow DAGs processing over 100,000 records per execution with retries, alerting, and structured logging.
- Optimized API payload transformations, reducing data synchronization failures by 25 percent.
- Collaborated with cross-functional teams to ensure 99.9 percent production data accuracy.

Full-Stack Developer Intern | eGov Foundation (On-Site) March 2025 – August 2025

- Developed full stack applications using React.js, Node.js, and Spring Boot.
- Upgraded the DIGIT platform frontend from React 17 to React 19 and Node.js from version 14 to 20.
- Migrated routing logic to React Router version 6 and resolved breaking changes across components.

PROJECTS

Wipro HRIS → Replicon User Sync | Deltek

Technologies: Apache Airflow, Python, REST APIs, CSV

- Designed and implemented an end-to-end HRIS integration to synchronize employee data from HRIS to Replicon.
- Built Apache Airflow pipelines to process delta CSV files covering new hires, updates, transfers, and terminations.
- Implemented business rules for supervisor assignment, role-based access, payroll configuration, and location hierarchy.
- Automated time-off policy assignment and accrual calculations, including prorated balances.
- Processed over 100,000 records per execution with 99.9 percent accuracy.

Digit-Frontend -Version Upgrade (Link) | eGov Foundation

Technologies: React.js, Node.js, Webpack, React Router v6

- Led frontend modernization by upgrading React, Node.js, and routing libraries to supported versions.
- Migrated the build system to Webpack, reducing bundle size by 30 percent and improving load time by 25 percent.
- Refactored over 150 components to improve modularity and resolve breaking changes.
- Integrated modern data-fetching patterns to improve performance and state management.

NxtWatch (sasiprject035.ccbp.tech) | (Personal project)

Technologies: React.js, JavaScript, REST APIs, JWT, CSS, Bootstrap

- Developed a video streaming platform with trending, gaming, saved videos, and search functionality.
- Implemented JWT-based authentication and authorization with secure session handling.
- Built protected routes to restrict access for unauthenticated users.
- Designed a responsive user interface using reusable React components.

CERTIFICATES

React JS [LINK](#), Node JS [LINK](#), JavaScript Essentials [LINK](#), Programming Foundations with Python [LINK](#)
Responsive Web Design using Flex box [LINK](#), Introduction to DataBases [LINK](#) , Data Analytics [LINK](#), Python [LINK](#)

ACHIEVEMENTS

Solved over 500+ LeetCode problems. [LINK](#)
